# Safety, Security & Style.

It all starts with an

# Endurance Door.

Renowned for their strength and security, an Endurance Door means you'll enjoy peace of mind every time you turn your key.

The 48mm thick solid timber core of an Endurance Door is up to 10% thicker than other doors on the market, a difference you'll hear each time you close your door. Whilst other doors may click shut, the reassuring clunk of an Endurance Door lets you know that your home is both safe and secure.

Each Endurance Door has a host of unique features that make it the most durable and hard-wearing door available. Designed to stand the test of time, your Endurance Door will require very little maintenance to keep it looking great for years to come.

Use our innovative HomeView Door Designer to try our range of door styles, colours, glazing and hardware accessories on a photo of your own home.

# Why Choose Endurance?

## Safety, Security & Style.

### ✓ Your Door. Your Style

With over 85 stylish door designs, 19 colours and an amazing choice of glazing and hardware accessories within our range, you're sure to find the ideal fit for your home. Let our brochure be your source of inspiration before heading over to our online HomeView Door Designer.

### ✓ Solid to the Core

The core of an Endurance Door is made up of 17 crossed layers of engineered timber, giving them unrivalled strength and a reassuring feel of quality.

Choose an Endurance Door to make would-be burglars think twice.

### ✓ Built to Last

Every Endurance Door is made with an integrated Moisture Barrier Strip at the foot of the door. This unique feature means that the timber core of an Endurance Door is protected from water ingress, removing the risk of swelling or sticking.

### ✓ Secured By Design

Secured By Design is the official UK Police initiative supporting the principles of 'designing out crime'. The Endurance Door design achieves this standard when combined with laminated glass and the 3 Star High Security Federal UCF locking cylinder.

In order to meet this standard the Endurance Door range has been put through a series of rigorous tests, designed to replicate methods a burglar might use to gain entry to your home. Including:

- A manual attack on the locking hardware, including a crow bar and mole grips
- Unlimited number of 3 minute attacks on the door cylinder using a range of tools such as screwdrivers and craft knives
- 3 minute manual attack using chisels and brick bolsters to gain entry through the door
- Hard Impact Test - The door is struck with a 50kg steel impactor at its hinge and locking points

### SLEDGEHAMMER-PROOF

We put the Endurance Door design to the test by attacking it with a sledgehammer.

Scan the above code with the camera on your Smartphone to see how we got on!

## Locking Cylinder

Our standard locking cylinder is anti-pick, drill and bump with a sacrificial cut included with our High Security Upgrade

A

## High Security Multi-point Locking System

Our locking systems are tested to Secured By Design specified PAS 24 Security Standards

B

## Solid Timber Core

48mm thick cross laminated solid timber core makes the Endurance Door the most solid and secure on the market

C

## Moisture Barrier Strip

Our unique moisture barrier strip is concealed within the foot of the door - preventing the Endurance Door from warping or swelling

D

## Hardware Accessories

Our Hardware Accessories have been rigorously tested to ensure their durability - so you can count on them to look great for years to come

E

## Hard Wearing Door Skin

CoolSkin® technology used to produce our door skins offers a realistic woodgrain texture whilst protecting against delamination, cracking, bowing or warping

F

## PVCu Door Frame

Our door frames are strong, secure and energy efficient. They are even made from environmentally friendly recycled plastic

G

## Thermally Toughened Glazing

Our range of stylish decorative glazing has been thermally toughened, offering the best in security whilst also looking beautiful

H

# The UK's Most Solid & Secure Composite Door

## Locking Options

Our range of Locking Mechanisms offer an exceptional degree of security, meaning you can relax knowing your home is protected by some of the most tried and tested locking technology available.

### Trulock+

A modern-day locking system with two tensile steel hooks and a centrally located deadbolt.

Ideally suited to doors with Lever/Lever or Lever/Pad handles. Lift the handle to engage the locking mechanism and lock with a key.

### AV2 Automatic Lock

This locking mechanism automatically locks once the door is slammed shut, with firing pins engaging the two tensile steel hooks. The deadbolt is then activated by turning the key.

The door can then be opened internally using a thumbturn cylinder, but remains completely secure from the outside.

Ideal for doors with fixed external handles. Once locked, entry from outside is gained by use of a key.

### AV3 Automatic Lock

The AV3 Locking mechanism has a magnetic trigger in its frame that causes two tensile steel hooks and two separate weather sealing elements to fire automatically once the door is slammed shut.

An optional daytime release function can be integrated to temporarily stop the door from automatically locking once closed.

Ideal for doors with fixed external handles. Once locked, entry from outside is gained by use of a key.

## Locking Cylinder Positioning

### Standard Position

The standard locking position of the Trulock+, AV2 and AV3 is mid-way down the door.

### Heritage Position

The AV2 and AV3 Automatic Locking Mechanisms are available in a Heritage variation. This locking position is ideal for bringing a traditional feel to your entrance and can be combined with any of our fixed handle options.

# FEDERAL UCF Cylinder ★★ ★

At Endurance Doors, we believe everyone has the right to feel safe and secure in their own home.

That's why our doors can be upgraded with the Federal UCF Locking Cylinder from Brisant, one of the most secure locking cylinders in the UK.

The clever locking system of the Federal UCF knows when it's being attacked, with a hidden locking mechanism that automatically engages to stop would-be burglars in their tracks.

Lock snapping has become the preferred entry method for UK criminals and the Federal UCF Locking Cylinder has another trick up its sleeve to keep burglars at bay. A sacrificial cut is used so that when the burglar grabs the end of the cylinder, just the tip snaps off, leaving more metal in front of the central locking mechanism as protection.

Having been tested to Sold Secure 'Diamond Grade' standards, the Federal UCF Locking Cylinder has achieved a level of security that far surpasses other locking cylinders on the market.

## £1000

### SECURITY GUARANTEE

We are so confident in the unprecedented level of security offered by the Federal UCF Locking Cylinder used in our doors, that in the unfortunate event your home is broken into by means of snapping the cylinder, we will offer £1,000 in compensation.

Terms & conditions apply. See website for full details.

# Your Choice, Your Colour

Endurance Doors are available in your choice of 19 different colours, with the option to choose an alternative colour for the exterior and interior of your door. Most of our customers choose a white internal finish, but with so many different colours available the choice is yours.

We're also able offer perfectly matching door frames for most of our door colours too.

\*Not available as a matching coloured frame. For doors of this colour we recommend a white or cream frame.

# Get The Look: Industrial Vintage

## Industrial Vintage

Industrial Vintage is about proudly displaying the building materials that many try to conceal. It's about adding a raw, unfinished look to the most thoughtfully designed entrances.

## Wood + Metal: A Match Made In Heaven

The authentic timber detailing of an Endurance Door, coupled with the shiplap style of the Rushmore Georgian gives this door a raw and handmade feel. Choose Anthracite Grey to add cool metallic vibes and continue the Industrial theme.

## Less Can be More

Far from boring, clear Ornate glazing has been chosen to offer a simplistic, no nonsense look to this entrance. Opting for clear glazing has also enabled this homeowner to add an extra layer of styling in the form of a decorative interior blind.

## TOP TIP:

One of the key elements to achieving an industrial look is the use of texture. Here, timber cladding, galvanized steel milk pails, terracotta pots and a woven interior blind complement each other, adding a variety of different textures and materials to complete the look.

## Experiment with Colour

Whilst a pared back colour palette is key to achieving an Industrial Look, you can experiment with adding in carefully considered colours to add a little intrigue to your entrance. Here, the homeowner has chosen to use plants to add in splashes of colour to great effect.

# Get The Look: Urban Luxe

## Urban Luxe

Clean, crisp lines, a simple colour palette and the use of materials like steel, chrome and glass will give your entrance a modern chic look.

## Simple Styling

Straight lines and stylish detailing are key features of the Alto Design. Coupled with one of our Grey or Black colours, this style is sure to add instant kerb-appeal to any home that leans towards a more modern appearance.

## Urban Steel

Continue the simple styling of your entrance with a Stainless-Steel Pull Handle. Available in a variety of lengths, opt to make a style statement with a long pull handle or choose functional and understated with a smaller size.

## Keep your Privacy

Wanting to maintain your privacy whilst still having a light and airy hallway? Choose Satin glass to enjoy the best of both worlds.

## Complete the Look

For a seamless look, match the colour of your windows and garage door to the colour of your stylish new Endurance Door. All of our Grey colours are readily available from other suppliers who manufacture both windows and garage doors.

# Threshold Options

## Threshold Options

We offer a threshold to suit every homeowner. The MDS25 and Macclex Aluminium Thresholds are both Part M Compliant and meet the latest regulations for Building Regulations for Easy Access.

## Our standards

# Our Green Promise

Environmental concerns and energy efficiency are core to our company ethos. We appreciate the need to act responsibly, but at the same time offer our customers new advances that 'thinking green' has to offer.

## Our accreditations:

- 1.** We've reviewed our work systems and wherever possible minimised our waste and energy.
- 2.** We manage an extensive recycling programme which covers packaging, polystyrene, cardboard, PVC-u, timber, paper, aluminium and steel.
- 3.** All of the timbers used in our doors are harvested from forests which are managed to meet the social, economic and ecological needs of present and future generations.
- 4.** The laminated veneer core is fully environmentally accredited which includes PEFC and full BM Trada 'Chain of Custody'. Chain of Custody certification outlines the requirements for tracking certified materials from the forest to the final product to ensure that the wood contained in the product originates from certified forest.
- 5.** Renewable and recyclable, Kerto is a highly eco-effective door core material, throughout its life cycle. The timber is sustainably managed PEFC/FSC – certified from Finnish forests. PEFC and FSC certification ensures that the entire forest supply chain promotes good practice in the forest and ensures that timber products are produced with respect for the highest ecological, social and ethical standards. This includes protection of indigenous people's rights to the methods of felling trees.
- 6.** Our transport department have reviewed their schedules to ensure that deliveries are made in the most fuel conscious manner possible, whilst preserving our assurances on delivery times.
- 7.** The vehicles we use have a heritage of fuel economy; low-rolling-resistance tyres, start/stop, cruise control and energy recuperation. Working together, they create instant fuel savings and lower emissions.
- 8.** In the manufacture of Endurance doors we aim to source thermoplastic components and materials that contain lead-free stabilisers which are better for the environment.
- 9.** The 5 chamber door outer frame PVCu profile has been specifically designed for thermal efficiency and is calcium organic using lead free stabilisers.

## Endurance Doors are tested to:

### BS 6375-1:2009
