

SignatureDOORS

MADE BY SMART ♦ UNIQUELY YOURS

Designed for the modern family,
offering style, security & great value.

✦ *Our Signature Doors are stylish, secure and very low maintenance – the perfect entrance door for modern families.*

Create your own Signature Style with Smart

Following the launch of our Designer Door range, our new Signature Door range includes a number of exciting new styles, finishes and accessories suitable for any property.

With a range that includes modern, traditional and classic front door styles to choose from, as well as our new collection of back doors, you can create the perfect look for your house or apartment. And with a huge range of colours, accessories and glazing designs to choose

from, you have everything you need to tailor the design to meet your needs. Style isn't the only thing that comes as standard with a Smart Signature Door; you can also be assured of outstanding safety and security together with exceptional value and long-life performance.

BRITISH MANUFACTURERS

With over 40 years' experience, we are the UK's leading supplier of aluminium window and door systems and are proud to be part of the Made in Britain network. We take great pride not only in the quality, breadth and depth of our product range, but also in our design expertise and support services.

We operate from a modern manufacturing plant in the south west of England, which houses three extrusion presses and three paint lines, as well as our support teams and distribution hub. Across all our operations, we are fully committed to reducing our impact on the environment and are working hard to become both carbon-neutral and energy self-sufficient.

We are proud to be recognised as a British manufacturing success story – and to be a member of the Made in Britain network.

Why you should buy an ALUMINIUM DOOR

With good looks and reliable performance guaranteed, Aluminium is the perfect choice for beauty, safety, security, durability and low maintenance.

Find out why Aluminium is the right choice for your new front door. Why settle for less?

An abundant resource

Aluminium is the Earth's most abundant metal. Thanks to its recyclability, it is estimated that 75% of aluminium produced in the 1880s is still in use today, ensuring the resource will last for generations.

Responsibly sourced

We source 100% of our aluminium billet from the world's three leading suppliers and have been awarded the BES 6001 standard for responsible sourcing by BSI.

Infinitely recyclable

Aluminium can be recycled infinitely without any loss of quality – and the recycling process uses 95% less energy compared to the production of primary aluminium.

Sustainable manufacturing

Environmental considerations are central to our planning and production. At all times, we aim to minimise the impact of our activities on the environment and have introduced a range of measures, from waste capture and recycling systems to the use of sustainable power generation.

Our doors are **intelligently designed** for your peace of mind

Unbeatable security

Our Signature Doors have been designed to provide the ultimate in safety and security, protecting your family and your home.

Virtually maintenance free

Simply wiping your door and frame with fresh water and a light detergent once a month is all that is needed to prevent the build-up of dirt.

Outstanding UV resistance

Our high-quality powder coating process means your door will stay bright and vibrant for longer. It won't ever fade, rust or need re-painting.

Strong and durable

The strong and durable powder coat finish will be much more resilient to chips, scuffs and scratches than painted doors.

Safe, warm and A+ energy efficient. Our aluminium doors will protect you and your home all year round, whilst saving money on your bills.

How do you assess performance?

Noise Reduction

For a glazed door, the thicker the glass the better the sound proofing. And because aluminium doors can support far heavier glazing units than either uPVC or timber, they are the perfect choice for peaceful and quiet living.

Thermal Efficiency

Our Signature Doors all feature polyamide barriers, which provide a thermal break between the outside and inside of the door. This effectively insulates the door, providing excellent thermal performance and efficiency.

Weather Resistance

Our Signature doors feature double rebated seals for the highest ratings for water tightness and wind resistance. The door finish also provides strong resistance to moisture, chemicals and UV damage, even in extreme environments like coastal locations.

A style for **EVERY TYPE OF HOME...**

Our new Signature Door range contains designs to enhance every style of home.

From contemporary chic, to timeless elegance, we have designed a range of styles that will enhance the appearance of any property whilst keeping it safe and secure. So whether you want a front or back door, traditional or modern, there's a Signature Door just for you.

Carnaby

DM3001

This modern classic provides elegance and style, allowing light to flood into your home.

Lansdown

DM3002

Three glazed panels add an interesting design twist to this stylish, modern entrance door.

OUR DOORS PROVIDE OUTSTANDING PROTECTION FOR YOUR HOME AS STANDARD

Anti Drill

Hardened steel anti-drill pins are located at each side of the cylinder. All moving pins are also nickel-plated hardened steel (50 HRC maximum).

Anti Snap

A 'sacrificial' zone is created to ensure that if the lock is snapped, an intruder cannot gain access to the inner workings.

Anti Pick

The locks are made in such a way that they are almost impossible to pick.

Combinations

Over 80,000 different key combinations

Anti Bump

It is not possible for an intruder to 'bump' the pins above the shear line to gain access.

Centre Latch & Deadbolt

Spring loaded centre latch providing a tactile resistance and a deadbolt offering maximum resistance to forced entry.

Top and Bottom Deadbolts

Hook bolt with dual round bolts offering maximum resistance to forced entry.

3 Star Rating

Our cylinders have been awarded a 3 star rating, which means they have passed all of the criteria of the TS007 British Kitemark.

PAS 24:2016
ACCREDITED

PAS 24 pending Q12023

Official Police Security Initiative

You're in safe hands with Smart. We have worked with the industry's leading security specialists to create a range of doors that exceed all industry standards.

Beautifully coordinated WITH YOUR HOME

We know how important it is to make a good first impression and the exterior of your home is the first thing guests will see before they even step inside.

From designs that complement your home and decor to trending colours and styles. Our Signature doors will coordinate beautifully with your home, both inside and out.
